SAFETY CHECK-OUT

After correcting the original service problem, perform the following safety checks before releasing the set to the customer:

1. Check the area of your repair for unsoldered or poorly-soldered connections. Check the entire board surface for solder splashes and bridges.
2. Check the interboard wiring to ensure that no wires are "pinched" or contact high-wattage resistors.
3. Check that all control knobs, shields, covers, ground straps, and mounting hardware have been replaced. Be absolutely certain that you have replaced all the insulators.
4. Look for unauthorized replacement parts, particularly transistors, that were installed during a previous repair. Point them out to the customer and recommend their replacement.
5. Look for parts which, though functioning, show obvious signs of deterioration. Point them out to the customer and recommend their replacement.
6. Check the line cords for cracks and abrasion. Recommend the replacement of any such line cord to the customer.
7. Check the antenna terminals, metal trim, "metallized" knobs, screws, and all other exposed metal parts for AC Leakage. Check leakage as described right.

LEAKAGE TEST

The AC leakage from any exposed metal part to earth ground and from all exposed metal parts to any exposed metal part having a return to chassis, must not exceed 0.5 mA (500 microamperes). Leakage current can be measured by any one of three methods.

1. A commercial leakage tester, such as the Simpson 229 or RCA WT-540A. Follow the manufacturers' instructions to use these instruments.
2. A battery-operated AC milliammeter. The Data Precision 245 digital multimeter is suitable for this job.
3. Measuring the voltage drop across a resistor by means of a VOM or battery-operated AC voltmeter. The "limit" indication is 0.75 V, so analog meters must have an accurate low-voltage scale. The Simpson 250 and Sanwa SH-63Trd are examples of a passive VOMs that are suitable. Nearly all battery operated digital multimeters that have a 2 V AC range are suitable. (See Fig. A)

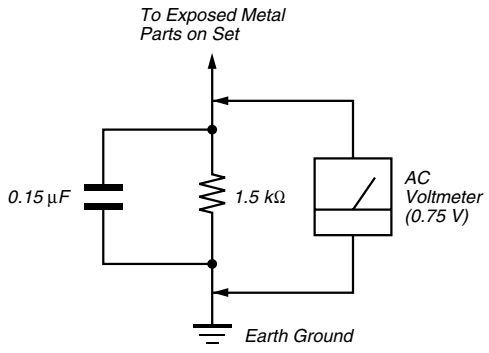

Fig. A. Using an AC voltmeter to check AC leakage.

2-2. TROUBLESHOOTING

Twin View

Problem	Possible Remedies
I cannot get Twin View to work	☐ If you are using a cable box to unscramble all channels (as shown on page 26), you cannot use the Twin View feature. This is because the cable box can unscramble only one channel at a time. But if you need the cable box to unscramble only some (usually premium) channels, you can use Twin View for unscrambled channels if you connect both a cable and cable box, as shown on page 25. ☐ You can use Twin View to view a signal from a different source that is connected to the TV's A/V jacks (such as a VCR or DVD player) in the second window by pressing the TV/VIDEO button while in Twin View. ☐ Digital sources, as well as any sources connected to the VIDEO 4, VIDEO 5, VIDEO 6 inputs, display in the left window, but not in the right windows.
There is no Twin View window, or it is just static	☐ Be sure the Twin View window is set to a video input or channel that has a signal airing. ☐ You might be tuned to a video input with nothing connected to it. Try cycling through the video inputs by pressing the TV/VIDEO button.
Twin View cannot display anything but TV channels	☐ Try cycling through the video inputs by pressing the TV/VIDEO button. Check that the Label Video Inputs option is not set to Skip. (See the Setup Menu on page 105.)
Twin View displays the same program in both windows	☐ Both Twin View windows might be set to the same channel. Try changing channels in either window.

Remote Control

Problem	Possible Remedies
Remote control does not operate	☐ The batteries could be weak. Replace the batteries. ☐ Check the orientation of the batteries. ☐ Press the TV (FUNCTION) button. You may have inadvertently pressed the SAT/CABLE (FUNCTION) button, which changes the remote control to SAT or CABLE mode. ☐ Make sure the TVís power cord is connected securely to the wall outlet. ☐ Locate the TV at least 3-4 feet away from fluorescent lights.
Cannot change channels with the remote control	☐ If you are using the TV to change channels, first press the TV (FUNCTION) button. ☐ If you are using another device to change channels, be sure you have not inadvertently switched your TV from the channel 3 or 4 setting. Use the Channel Fix option to ìf ixî the channel based on the hookup you used (see page 99). ☐ If you are using another device to change channels, be sure to press the FUNCTION button for that device. For example, if you are using your cable box to change channels, be sure to press the SAT/CABLE (FUNCTION) button.
Remote control does not operate non-Sony video equipment	☐ If you replaced the batteries to the remote recently, the code numbers for the video equipment may need to be reset. ☐ There may be more than one code for the equipment that you are attempting to operate. ☐ There is a possibility that some non-Sony equipment cannot be operated by your Sony TV remote.You may need to use the equipmentís original remote control.

CableCARD™

Problem	Possible Remedies
Problems using CableCARD™ or CableCARD™ services	☐ Check that the CableCARD™ is inserted properly (see page 51). ☐ The CableCARD™ must be activated by your local cable TV provider before you can receive digital cable TV services. See the activation instructions on page 51. ☐ Check the Diagnostics and CableCARD™ menu options (see page 108). (This can be useful in providing information to an authorized technician or repair person.) ☐ Contact your cable TV provider.

Channels

Problem	Possible Remedies
Cannot receive upper channels (UHF) when using an antenna	☐ Press ANT to select the VHF/UHF input (see page 57). ☐ Use Auto Program in the Channel Menu to add receivable channels that are not presently in the TVís memory (see page 99).
TV is fixed to one channel	☐ Use Auto Program in the Channel Menu to add receivable channels that are not presently in the TVís memory (see page 99). ☐ Check your Channel Fix settings (see page 99).
Cannot receive any channels when using cable TV	☐ Use Auto Program in the Channel Menu to add receivable channels that are not presently in the TVís memory (see page 99). ☐ Press ANT to select the CABLE input (see page 57).
Cannot receive or select channels	☐ Use Auto Program in the Channel Menu to add receivable TV channels that are not presently in TV memory (see page 99).
Some digital cable channels are not being displayed	☐ Certain cable TV companies have limitations on the broadcast of digital cable channels. Check with your cable TV company for more information. ☐ Check with your cable TV company if the channels are scrambled or encrypted. You will need a CableCARD or a separate set-top box to view those channels. ☐ Some optional digital cable broadcast formats may not be supported. If your cable TV company is broadcasting digital signals in unsupported broadcast formats, you will need a separate set-top box provided by your cable TV company to view those channels. ☐ The digital cable channel may be set to Hide in the Channel Menu (see page 99). ☐ Use the Digital Channels feature to search for new digital channels (see page 99).

Memory Stick

Problem	Possible Remedies
Image does not display/Cannot see all files	☐ Make sure the image file is a JPEG (.jpg, .jpeg) file or an MPEG1 (.mpg, .mpeg) file. ☐ Make sure the Memory Stick is inserted properly (see page 78). ☐ Check the Filter option setting (see page 89). ☐ Check the Select Folder setting (see page 89) and ensure that files are either in DCF directories if Digital Camera Folders is selected (see page 89), or in the currently selected folder if Select a Folder is selected (see page 89). ☐ The maximum number of files the Memory Stick Viewer can display is 2,000 files total, including all JPEG, MPEG1, and MP3 files. ☐ If you are using a Memory Stick with the Memory Select function, try changing the position of the A/B select switch.
JPEG image displays undesirable motion or flicker in full screen	☐ JPEGs captured using a digital video camera may appear to display motion in full screen. This is a result of the way digital video cameras record still images, and is not a result of a malfunction with the TV.
Rotation not saved after Memory Stick is ejected or Memory Stick Viewer is closed	☐ The Memory Stick might be locked. Unlock the Memory Stick and try rotating the image again. ☐ The file might not have information (EXIF data) that is usually generated when a digital camera records a photo. In this case, it is not possible to save the rotation. ☐ There might be insufficient space on the Memory Stick to save the rotated file. Try deleting one or more files and rotating the image again.
Cannot show (or hide) file information in full screen or Slide Show	☐ Set the File Information option to On or Off (see page 88).
Cannot set print quantity	☐ The Memory Stick might be locked. Unlock the Memory Stick and try rotating the image again.
Cannot see Menu	☐ Press ↟ to display the Menu again.
Cannot hear audio while using Memory Stick	☐ Check the TVís volume or Speaker (page 96) settings. ☐ To hear JPEG voice memo in full screen view, select the Digital Camera Folders option and set the Filter option to Show All Print Marks. ☐ Check that the Music option is not to set to Off (see page 88).
Not all MP3 files on Memory Stick are included when the Music /Complete List option is selected (page 88)	☐ The Memory Stick Viewer can display a maximum of 2,000 files total, including all JPEG, MPEG1, and MP3 files. ☐ Make sure that the file is named with the file extension (.mp3).
Cannot see MP3 list to play music	☐ MP3 files on your Memory Stick only can be played as background music during a Slide Show (see page 88).
MP3 file does not play back correctly	☐ The Memory Stick Viewer supports only MP3 files with a fixed data rate of 128 kbps (kilobits per second).

MP3 files on the Memory Stick are not listed	☐	Only MP3 files that are named with the file extension (.mp3) are displayed in the list.
Music files are playing in wrong order	☐	MP3 files are played in alphabetical order, according to the folder in which they are stored. If you want to change the playlist order, rename your files alphabetically in the order in which you want them to play.
MPEG1 movie does not play back correctly	☐	Some variations of MPEG1 movies may not be compatible with the Memory Stick Viewer.

Problem	Possible Remedies		
MPEG1 quality is poor when enlarged (page 86)	☐	The quality of the movie when enlarged depends on the resolution of the MPEG1 file. See your cameraís instruction manual for details.	
Error message is displayed	☐	No Memory Stick	There is no Memory Stick in the slot.
	☐	Memory Stick Locked	The lock mechanism on the Memory Stick is engaged.
	☐	Memory Stick Error	The Memory Stick in the slot might be damaged; try a different Memory Stick.
	☐	Format Error	The Memory Stick may have been formatted using a PC or other device that is not compatible with cameras.
Error icon is displayed			The file is not a valid MPEG1 or JPEG format, or it is a progressive JPEG (which is not supported).
			The thumbnail is not DCF-compatible.
			The file is a JPEG or an MPEG1, but the thumbnail is unreadable.
			The file is unreadable.

Audio

Problem	Possible Remedies
Good picture, no sound	☐ Press MUTING so that the word Muting disappears from the screen (see page 56). ☐ Make sure the Speaker option is set to On in the Audio Menu (see page 96). ☐ Make sure the MTS option is set to Stereo or Mono (see page 95).
Cannot gain enough volume when using a cable box	☐ Increase the volume of the cable box using the cable box's remote control. Then press TV (FUNCTION) and adjust the TVís volume.
Sound seems weak or insufficient	☐ The TV's audio might be set to Auto SAP or Mono, when it might be better set to Stereo. In the Audio Menu (see page 95), set the MTS setting to Stereo. If already set to Stereo, switch to Mono (which may reduce background noise during weak stereo broadcasts).
Cannot raise the volume on external audio speakers	☐ If the Speaker option is set to Off and the Audio Out option is set to Fixed (in order to output the sound to your audio system) use your audio receiver to adjust the sound (see page 96). Or, to use the TV remote control, set the Audio Out option to Variable. ☐ To turn on the TV speakers, set the Speaker option to On (see page 96).
There is no sound from WOOFER	☐ Check the screen if there is a display message stating the WOOFER is disconnected. If the message is shown, you may need to contact your dealer or Sony Customer Information Service Center to check the connection.

Video

Problem	Possible Remedies
No picture (screen not lit), no sound	☐ If your TV does not turn on, and a red light keeps flashing, your TV may need service. Call your local Sony Service Center. ☐ Make sure the power cord is plugged in. ☐ Press the POWER button on the right side of the TV. ☐ Press the TV/VIDEO button to cycle through the connected video sources. ☐ Try another channel; it could be station trouble.
Dark, poor or no picture (screen lit), good sound	☐ Adjust the Picture option in the Video Menu (see page 92). ☐ Adjust the Brightness option in the Video Menu (see page 92). ☐ Check the antenna/cable connections.
No color./Dark picture./ Color is not correct.	☐ Press the PICTURE (MODE) button to select the desired Picture mode (see page 56). ☐ Adjust the Color option in the Video Menu (see page 92).
Only snow and noise appear on the screen	☐ Check the antenna/cable connections. ☐ Try another channel; it could be station trouble. ☐ Press ANT to change the input mode (see page 57).
Dotted lines or stripes	☐ Adjust the antenna. ☐ Move the TV away from noise sources such as cars, neon signs, or hair-dryers.
Double images or ghosts	☐ Using a highly directional outdoor antenna or a cable may solve the problem.
Striped noise during playback/recording of a VCR	☐ Video head interference. Keep your VCR away from the TV. ☐ Leave a space of 30 cm (11 7/8 inches) between your VCR and the TV to avoid noise. ☐ Avoid installing your VCR in front of the TV or at the side of the TV.
Image left on screen	☐ Perform image retention recovery. (see page 98) ☐ Use the Screen Saver function (see page 98).
The screen flickers when turning on the TV.	☐ This is caused by feature of the Plasma Display Panel, and does not indicate a malfunction of the TV.
ìBl ack boxî on screen	☐ You have selected a text option in the Setup Menu and no text is available. (See page 104 to reset Setup selections.) To turn off this feature, set the Caption Vision option to Off. If you were trying to select closed captioning, select CC1 instead of TEXT 1-4.
Bars appear at the top and bottom of the screen	☐ Some wide-screen programs are filmed in aspect ratios that are greater than 16:9, such as 2.35:1. (This is especially common with theatrical releases). Your TV will show these programs with bars at the top and bottom of the screen. For more details, check the documentation that came with your DVD (or contact your program provider).
Certain programs on DVD or other digital sources display a loss of detail, especially during fast-motion or dark scenes	☐ The compression used by certain digital broadcasts and DVDs may cause your TVís screen to display less detail than usual, or cause artifacts (small blocks or dots, pixelations) to appear on your screen. This is due to your TVís large screen and ability to show very fine detail, and is normal for certain digitally recorded programs. Adjust the reality/clarity in the DRC Palette option (see page 93) to optimize the picture while viewing these sources.

General

Problem	Possible Remedies
How to reset TV to factory settings	☐ Turn on the TV. While holding down the RESET button on the remote control, press the POWER button on the right side of the TV. (The TV will turn itself off, then back on again.) Release the RESET button.
How to restore Video settings to factory settings	☐ Press the RESET button on the remote control while in the Video Menu (see page 92).
How to restore Audio settings to factory settings	☐ Press the RESET button on the remote control while in the Audio Menu (see page 95).
Cannot cycle through the other video equipment connected to the TV	☐ Be sure the Label Video Inputs option is not set to Skip (see page 105).
Cannot operate Menu	☐ If a Menu option appears in gray, this indicates that the TV is in a state in which the Menu option is not available.
Lost password	☐ In the password screen (see page 101), enter the following master password: 4357. The master password clears your previous password; it cannot be used to temporarily unblock channels.
TIMER LED on front panel is lit	☐ The LED (see page 16) blinks when the TV is turned on, then shuts off when the picture is displayed. If the LED blinks continuously, this may indicate the TV needs service. When lit, indicates that the timer is set (page 107). When the timer is set, this LED will remain lit even when the TV is turned off.
Digital cable box does not work	☐ If you are connecting a VCR and digital cable box using a splitter, as described on page 32, you must use a special bi-directional splitter that is designed to work with your digital cable box. Contact your cable TV company for details.
Cannot record digital channels to VCR	☐ Only analog channels can be recorded to your VCR.

Note:

- All capacitors are in µF unless otherwise noted. (pF: µµF)
  Capacitors without voltage indication are all 50 V.
- Indication of resistance, which does not have one for rating electrical power, is as follows.

  Pitch: 5 mm

  Rating electrical power 1/4 W (CHIP : 1/10 W)
- All resistors are in ohms.
- : nonflammable resistor.
- : fusible resistor.
- : internal component.
- : panel designation, and adjustment for repair.
- All variable and adjustable resistors have characteristic curve B, unless otherwise noted.
- : earth-ground.
- : earth-chassis.
- When replacing the part in below table, be sure to perform the related adjustment.
- All voltages are in V.
- Readings are taken with a 10 M digital multimeter.
- Readings are taken with a color-bar signal input.
- Voltage variations may be noted due to normal production tolerances.
- ⁎ : Names and values of parts depend on models.
- ⁎ : Can not be measured.
- Circled numbers are waveform references.
- : B + bus.
- : B – bus.
- : Signal path.

Note: The components identified by shading and mark ⚠ are critical for safety. Replace only with part number specified.

Note: Les composants identifiés par un tramé et une marque ⚠ sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.
